Dr. Roberts investigates efficacy of inoculants and the use of winter cover crops to improve soybean performance and yield following rice in the full season soybean production system.

Get the highlights of his investigation [here](#).

High Oleic Soybean Motor Oil Drives Innovation

Biosynthetic Technologies recently achieved certification from the American Petroleum Institute (API) on a motor oil containing 35 percent of a synthetic ester, called an estolide, made from high oleic soybean oil.

Farmers and other consumers may see this high-oleic-soybean oil derived product in stores in as little as two years.
