Arkansas Soybean Month Recap

As we wrap up November, we can't help but feel thankful for everyone who participated in the [Arkansas Soybean Month](#) celebration. A special thanks to **Governor Asa Hutchinson** for helping ASPB promote Arkansas Soybean Month and the Board's 50th anniversary on KATV Channel 7. Check out our Arkansas Soybean Month release [here](#).

To celebrate Arkansas Soybean Month we gave out free 50th anniversary tote bags at the [St. Joseph Center of Arkansas](#), [The Brambles](#), and the [Olde Crow General Store](#).

The ASPB is celebrating 50 years of service to soybean producers. Here is the latest documentary looking back at the Board's work helping Arkansas soybean producers.

**USB Executive Committee Column – Jim
Carroll III, Past Chair**

Read as Jim Carroll reflects on the 15 years he has devoted to serving on the United Soybean Board in this USB weekly update. Additionally, learn more about USB's implementation plan, how USSEC connections led to a new soybean meal market, research behind soybean cyst nematodes, and how the South Dakota soybean research and promotion council is advancing research.

Arkansas Research Arms Soybean Farmers Against Southern Root-Knot Nematodes

Soil harbors countless beneficial microorganisms that help plants thrive. But it also harbors plant-killers. In Arkansas and other areas of the Mid-South, the southern root-knot nematode decimates soybeans. Watch this Featured Research video to learn about the work being done to combat Southern Root-Knot Nematodes.

Rotate SCN–Resistant Seed Varieties for Optimal Protections

Understanding the difference between soybean cyst nematode-resistant varieties may help soybean growers understand the importance of rotating sources of resistance, which is one of the “active SCN management” strategies advised by The SCN Coalition. For combating SCN during the 2022 growing season, The SCN Coalition encourages growers to work with their advisors to select the appropriate SCN-resistant varieties. Read the full story [here](#).

USB and WISHH Celebrate World Fisheries Day

During November, the US soybean industry came together to celebrate World Fisheries Day. According to the United Nations' Food and Agriculture Organization (FAO), fish consumption in Africa and Asia is projected to steadily increase over the next 10 years, particularly as populations strain food systems in the developing world. In fact, aquaculture is the fastest-growing segment of the feed industry, with production expected to grow to 109 million metric tons by 2030, an increase of 32% compared with 2018. Learn more about the successes being achieved in this area [here](#) – or to learn about the aquaculture industry here in Arkansas, click below.
