2022 Grow for the Green Soybean Yield Challenge Kicks Off

The application period for the 12th annual [Grow for the Green Soybean Yield Challenge](#) is officially open now through August 1, 2022. Soybean producers in Arkansas are eligible and encouraged to participate in this year's contest for a chance at winning a cash prize for producing the crop with the highest yield in their region. By participating, you'll also be helping the industry collect valuable production data and promote best production practices in the state.

Detailed Data Supports Irrigation Management Decisions

Since 2019, the Arkansas Soybean Promotion Board has been funding an irrigation management research and education project that [UADA's Chris Henry](#) leads. His team developed a practical app. They also provide unique opportunities for farmers to improve irrigation management in soybeans: a practical workshop and an irrigation yield contest.

New research is continuing to make Arkansas's [Soil Sensor Calculator app](#) more precise, according to developer, Chris Henry of the University of Arkansas Division of Agriculture.

Read more about how this innovative app is helping soybean producers manage their resources more efficiently, by [clicking here](#) to jump to the full article by the *Delta Farm Press*.

Career Snapshot

Nathan Bailey

Nathan Bailey grew up in Monticello, Arkansas. He founded Waterbug Irrigation, LLC (Waterbug) in 2017, while attending [Arkansas State University](#) full-time. He enjoyed working on a farm's irrigation system, but he got tired of repairing blown out polypipe and knew there had to be a better way. As the son of two entrepreneurs, Bailey naturally began to work on an alternative solution. Nathan invented The Bailey Patch and designed The Original Pink Polytube, two products that set Waterbug apart from the rest.
